

Coupon Discount

Category	Product
Course	Discount Wizard
Version	1.1
Client	Generic
Software	2.18.5.34

Hints and Tips

- ✓ Use this discount to issue a discount coupon that prints at the end of a receipt.
 - This discount was originally designed for fuel coupons, but can be used for any coupons.

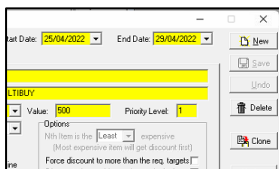

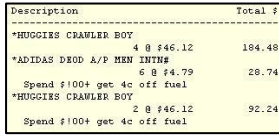

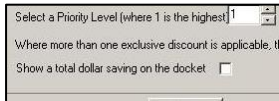

- ✓ Coupons are automatically non-exclusive; a customer can be eligible to receive more than one coupon, but each coupon can only be triggered once.
 - If the number of eligible coupon offers exceeds the maximum configured (see below), POS applies each type in order of **priority** (or by lowest **Discount ID** if they have the same priority).
 - To offer a **tiered fuel offer** (e.g. spend \$30 get 4¢ off, \$50 get 5¢ off, \$100 get 10¢ off):
 - make the best offer the highest priority (1), and the others reducing priority
 - set the **Max VBO offer** (below) to [1], if you only want one fuel coupon to print per transaction.

- ✓ To offer coupons, the following must be selected in POS Config.:
 - **Item** -> **Discount** tab -> **Fuel Offer Enabled** check box.
 - **Discount** tab -> **Max QBO per transaction**: the maximum number of quantity type discounts that can apply to a transaction (defaults to 2).
 - **Discount** tab -> **Max VBO per transaction**: the maximum number of value type discounts that can apply to a transaction (defaults to 1).
 - **Print item details for fuel offer**: usually leave unselected, unless you want the discount description to print under every product that was used as criterion.

Examples of Coupon Discounts:

- Get a 4¢ off fuel coupon when you spend \$100 or more in a single transaction (excluding cigarettes)
- Get a coupon for a free pizza loaf in your next purchase, when you spend \$15 in fresh bakery in a single transaction.

Procedure to Create a Coupon Discount

1.	From the HOS/BOS Tools menu, select Discount Wizard .							
2.	<table border="1"> <tr> <td>To:</td> <td>Then:</td> </tr> <tr> <td>Create a discount from scratch</td> <td>Click New. Go to step 3.</td> </tr> <tr> <td>Use another discount as the base (copy it)</td> <td>Search for and select the discount to see on-screen. Click Clone. *All details are copied, and the Description now starts with 'CLONE'* *Click Undo to cancel creation of this discount.* Edit the discount, i.e. update the description, dates, and items. Go to step 20 to save.</td> </tr> </table>	To:	Then:	Create a discount from scratch	Click New . Go to step 3.	Use another discount as the base (copy it)	Search for and select the discount to see on-screen. Click Clone . *All details are copied, and the Description now starts with 'CLONE'* *Click Undo to cancel creation of this discount.* Edit the discount, i.e. update the description, dates, and items. Go to step 20 to save.	 
To:	Then:							
Create a discount from scratch	Click New . Go to step 3.							
Use another discount as the base (copy it)	Search for and select the discount to see on-screen. Click Clone . *All details are copied, and the Description now starts with 'CLONE'* *Click Undo to cancel creation of this discount.* Edit the discount, i.e. update the description, dates, and items. Go to step 20 to save.							
3.	Type a brief description of the discount. *Maximum 80 characters.*							
4.	Type a description that will print on the customers receipt next to the discount amount (below the target product). *Maximum 30 characters.* *It only prints if the POS Config. Print Item Detail for Fuel Offer check box is selected.*							
5.	Select the Start Date that the discount is effective in stores. *Defaults to today's date.*							
6.	Select the End Date for the discount; the last day that customers can get the discount. *If the offer is long-term, select an end date as far in advance as you foresee the discount being offered; this prevents it ending unexpectedly.*							
7.	Select a Priority Level for this discount. *[1] is the highest priority; this ensures that this discount isn't impacted by any other discount.*

Hints and Tips

- ✓ Function buttons:
 - **Back:** to check/edit selection/s on the previous screen.
 - **Next:** to go to the next screen.
 - **Cancel:** to cancel the discount
- ✓ If you leave the **Days Expires** in as [0], the text *This offer expires on: xx/xx/xx* doesn't print on the receipt.
 - For fuel offers, the expiry in the barcode is the end date you selected in step 6.
 - You may like to do this for in-store discounts that you want to end on one date (as set in the redemption discount; include the end date in the Offer Text instead).
- ✓ Include the following text in the **Offer Text** section:
 - The service station/s where fuel coupons are redeemable
 - The discount amount & any other conditions.
 - The PLU of the coupon, for in-store coupons pre-V2.14.
- ✓ From version 2.14, **coupons that are redeemed in-store** print a coupon barcode on the receipt.
 - Refer to [PRO-3c Adding Criterion Fact Sheet](#) for instructions on setting up a stock record for a coupon.

- ✓ Sample fuel coupon on receipt:
 - The expiry & discount amount are also in last 10 digits.

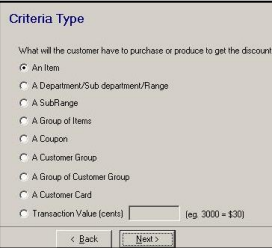

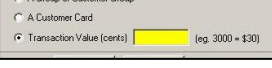

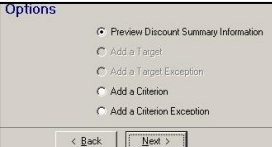

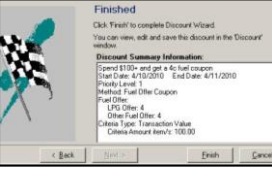

8.	Click <input type="button" value="Next >"/> .									
9.	In the Select Discount Method field, select Fuel Offer Coupon .									
10.	Click <input type="button" value="Next >"/> .									
11.	In the Days field, type the number of days that an issued coupon lasts. <i>*Starting from the next date after it's issued.*</i>									
12.	<table border="1"> <thead> <tr> <th>If this discount:</th> <th>then:</th> </tr> </thead> <tbody> <tr> <td>is a fuel coupon and the service station system accepts a scannable barcode</td> <td>select the Fuel Offer check box. In the LPG Fuel Offer field & the Other Fuel Offer field, type the cents off per litre that will be offered.</td> </tr> <tr> <td>is a fuel coupon and the service station is independent</td> <td>unselect the Fuel Offer check box. Go to step 13.</td> </tr> <tr> <td>is an in-store coupon (non-fuel)</td> <td>unselect the Fuel Offer check box. In the Barcode field, type the barcode of the coupon. <i>*In versions before 2.14, type the barcode in the Offer Text section.*</i></td> </tr> </tbody> </table>	If this discount:	then:	is a fuel coupon and the service station system accepts a scannable barcode	select the Fuel Offer check box. In the LPG Fuel Offer field & the Other Fuel Offer field, type the cents off per litre that will be offered.	is a fuel coupon and the service station is independent	unselect the Fuel Offer check box. Go to step 13.	is an in-store coupon (non-fuel)	unselect the Fuel Offer check box. In the Barcode field, type the barcode of the coupon. <i>*In versions before 2.14, type the barcode in the Offer Text section.*</i>	
If this discount:	then:									
is a fuel coupon and the service station system accepts a scannable barcode	select the Fuel Offer check box. In the LPG Fuel Offer field & the Other Fuel Offer field, type the cents off per litre that will be offered.									
is a fuel coupon and the service station is independent	unselect the Fuel Offer check box. Go to step 13.									
is an in-store coupon (non-fuel)	unselect the Fuel Offer check box. In the Barcode field, type the barcode of the coupon. <i>*In versions before 2.14, type the barcode in the Offer Text section.*</i>									
13.	In the Header Text section, type the text that will print at the top of the receipt. <i>*This is usually your business name & the saving.*</i>

Hints and Tips

- ✓ **Criterion** is conditions that the customers purchase has to meet to get the coupon, either:
 - a **Value**; when they spend a certain amount (this is always based on the total after all other manual and auto discounts); e.g. 'Get 4¢ off fuel when you spend \$100 or more in a transaction.
 - a **Quantity**; when they buy a certain product, produce another coupon, and/or belong to a certain customer group or price level.
- ✓ For **quantity** type discounts, if a product has received another discount or been already used as criterion, it can still be used to trigger this coupon offer (so long the POS Config. **Re-use Criterion** check box is selected).
- ✓ The **Add a Target** and **Add a Target Exception** options aren't used in this type of discount.
- ✓ **Criterion Exceptions** are specific products in the criterion group (selected in step 0) that you don't want to be used as criterion; think of it as filtering out products when you've used broad criterion.
 - E.g. Get 4¢ off fuel when you spend \$100 or more in a single transaction (C), excluding cigarettes (buying cigarettes won't count towards the \$100).
 - Don't use exceptions if the criterion is a single item.
 - Don't use the **...All products** check box; this would exclude all the criteria!

14.	<p>In the Offer Text section, type the details of the offer.</p> <p><i>*Format the text as you want it to print on the coupon; press Enter to start text on a new line.*</i></p> <p><i>*Maximum of 1136 characters/digits/spaces.*</i></p>									
15.	<p>In the Message Text section, type any additional text to print below the coupon.</p> <p><i>*Maximum of 190 characters/digits/spaces.*</i></p>									
16.	<p>Click .</p>									
17.	<p>Complete the following steps to specify the conditions that the customers transaction has to meet to get the coupon:</p> <table border="1" data-bbox="614 694 1189 1209"> <thead> <tr> <th>To create a:</th> <th>then:</th> </tr> </thead> <tbody> <tr> <td>quantity based discount</td> <td> select the type of object that the customer has to produce. add additional conditions	you'll use the Add a Criterion option. Return to step 17.									
exclude certain products from a condition	you'll use the Add a Criterion Exception option. Go to step 19.									

PRO-30 Page | 4 of 5

Hints and Tips

- ✓ The **Limit Per Customer** section isn't used; [1] is always the maximum number of applications of this specific coupon in a transaction.

19. Complete the following steps to add a criterion exception:
- On the Options screen, select **Add a Criterion Exception**.
 - Click
 - If there's more than one criterion, click the one that you want to add an exception for.
 - Click
 - Select the type of exception.
 - Click
 - Select the EAN or category to exclude.
The adjacent example shows a discount where cigarettes and tobacco won't count towards qualifying for a fuel coupon.
 - Click
*A summary is displayed; **Exception Type 2** represents a criterion exception.*
 - Click . The Options screen is displayed.
 - Return to step 18.

20. Once you've clicked (at step 18), review and change the discount as required.
*Click the **Criteria** and **Coupon** tabs to view the detailed parameters.*
*If required, click the **Labels** tab to design a ticket; refer to the [PRO-3d Add a Discount Ticket Fact Sheet](#).*

21. Click
