Hints and Tips

- ✓ Refer to [TECH-2i Configure what Products get Discounted at POS fact sheet](#) for auto discounting options at POS.
- ✓ Create a promotion instead of a discount if the customer only has to buy one unit, e.g. Kleenex Tissues 170pk \$2, save 29¢. Too many discounts slow POS down, & promotional ticketing is auto-created.
- ✓ There are two ways to give customers loyalty prices:
 - If your business sets up AR records for loyalty customers, configure & create a **price level promotion or discount**. Refer to [Tech-4d Configure Special Customer Pricing Fact Sheet](#).
 - If your business only issues cards, create a discount with a customer group as criterion. Refer to the [PRO-3c Adding Criterion Fact Sheet](#).
- ✓ Don't create a discount if a free item that you don't normally stock is given by the supplier.
 - E.g. Buy any Mars chocolate & get a toy football free.
 - Add a **Stock Message** on the Stock screen; this displays when the product is scanned at POS. (Contact SUREfire Support if the stock message function isn't configured).
- ✓ POS only applies the full value of a discount if the final transaction amount due will be greater than or equal to \$0.00 (excluding refunds).
- ✓ Run the **Reports** menu -> **Sales** -> **Discounts** report to analyse how many times a discount has been applied at POS.

Overview of Discount Wizard

'**Automatic**' discounts are created in Discount Wizard;
'**Manual**' discounts are applied by an operator at POS.

Use this guide to the type of automatic discount you want to create.
